CAREER OBJECTIVE

Seeking a web developer position that offers opportunities for growth and skill enhancement. I aim to leverage my technical expertise, problem-solving abilities, and innovative mindset to contribute effectively to a forward-thinking development team. Committed to supporting the organization's mission and goals through continuous improvement and collaboration in web development.

EDUCATION

Technological Institute of the Philippines - Manila	2024
Bachelor of Science in Information Technology	
- Cum Laude - Participant in APPCON 2023 - Participant in Samsung Create 2023 - Dean's Lister, 1st sem 2023 - 2024 ; - President's Lister, 1st to 2nd sem 2022 - 2023	
Polytechnic University of the Philippines	2019
Senior High School - Information and Communications Technology	
With Honors Graduate	

WORK EXPERIENCE

Full Stack Web Developer Intern	February 2024 – June 2024
Linoflap Technology Philippines Inc	
- Led and managed the creation of an online platform for marine and cargo management. - Developed both backend and frontend features for web projects. - Utilized a range of technologies including Next.js, React.js, Prisma, Drizzle, Zod, Lucia, and Cloudinary. - Implemented server actions, API endpoints, and managed database interactions. - Ensured seamless integration of backend functionalities with the frontend interface. - Handled media management and optimized delivery using Cloudinary.	

KEY SKILLS

- Frontend Development:** Proficient in HTML, CSS, JavaScript, and frameworks such as Tailwind CSS and Bootstrap. Experience deploying web applications using Render and Vercel.
- Backend Development:** Skilled in TypeScript, Node.js, and Express.js. Proficiency in utilizing databases like PostgreSQL, MySQL, MongoDB, and Neon for serverless PostgreSQL. Knowledge of authentication mechanisms including Lucia, Next Auth, and JWT.
- Database Management:** Experienced in database management systems such as PostgreSQL, MySQL, MongoDB, and Neon for serverless PostgreSQL.
- Version Control:** Proficient in version control using Git and GitHub.
- API Development:** Knowledgeable in RESTful API development. Proficient in testing APIs using Postman.
- Google Workspace:** Proficiency in Google Workspace applications including Docs, Sheets, and Slides.

PROJECTS / RESEARCHES

- Capstone - EcoCycle: Streamlining Sustainable Technology Donations through an Efficient Web-Based Platform**
- As the main developer, I led a three-member team using Agile methodology to build EcoCycle, a computer parts donation platform with Node.js, Express, Prisma, and MongoDB. EcoCycle promotes e-waste reduction with features like geolocation for drop-offs and an analytics dashboard.
- Marine Management System**
- As the full-stack developer focused on backend tasks, I developed the Marine Management System with Next.js. In a three-member team, I implemented serverless PostgreSQL with Neon, Drizzle ORM, and Lucia for secure authentication. The platform uses Cloudinary for file management and Zod for data validation, enhancing communication and connectivity in the marine industry.
- SparkFlow: Secure Web Application for User Privilege Management**
- As the main developer, I developed SparkFlow, a web application using Node.js, Express, Prisma, and MongoDB, hosted on Render. It manages user privileges with MongoDB's document-oriented structure and ensures data security through bcrypt hashing, encryption, and strict access controls. Render integration provides seamless deployment, automatic SSL, and scalable infrastructure.

Thrifty Haven: Thrift Shop Management System:

Contributed to the development of Thrifty Haven, a thrift shop management system, emphasizing security and efficiency. Leveraged Next.js for frontend and Neon for serverless PostgreSQL. Implemented Lucia for secure authentication, Zod for form validation, and Drizzle for query management. Enabled seamless communication between the store and customers through RESTful API, enhancing operational efficiency and customer experience.
